

Birdseed Eggs

Supplies Needed:

Gelatin

10 cups bird seed

(5 cups birdseed if you make $\frac{1}{2}$ the recipe)

Plastic eggs (the larger size is the easiest to work with)

Nonstick spray

Instructions:

1. Make gelatin according to package directions. We made $\frac{1}{2}$ the package and it made the 1 large egg and 18 small eggs.
2. Add 10 cups birdseed (5 cups if you made $\frac{1}{2}$ the package of gelatin)
3. Spray the inside of the eggs with nonstick spray.
4. Fill eggs with bird seed mixture and close the eggs.
5. Put in the refrigerator overnight.
6. Open the eggs and place in a tree or anywhere you want your birds to eat.
